Class A row house in Jägala!

We are pleased to present you new row houses in the residential area of Jägala. The new row house is located in a wooded area, close to the famous waterfall and golf course.

The house to be built has A-class energy efficiency. -5-room large house -3 bedrooms - own study -1st floor, in addition to the kitchen, living room and hallway, there is also a utility room, a sauna, a shower room and a laundry room - On the 2nd floor, in addition to 3 bedrooms, there is also a bathroom with a bath -For sale with finishing -The house will be commissioned in March 2023.

The house will be built from columbia-block, poured with concrete, ceilings from reinforced concrete slabs. Between the boxes we use columbia-block 240, which allows us to enhance the soundproofing qualities.

We use only the highest quality materials for interior decoration, if necessary, it is possible to fully furnish according to the requirements of the client. In the new quarter under construction there will be 186 residential boxes, a kindergarden, sports and children's playgrounds.

The price includes all interior decoration. The townhouses will be handed over in March 2023. If desired, the buyer can change the layout and choose finishing materials. Ecologically heated boxes - geothermal heating. Energy efficiency class A.

The entire area will be under video surveillance.

The complex is in a great location, 25 minutes by car from the center of Tallinn.
