<b>Land area</b>	1568 m2
<b>Area</b>	1034 m2
<b>Category</b>	For sale

The architect of this project looked for inspiration in the surrounding nature and adhered to the concept of preserving the trees already growing on the site. Intervention in the terrain of the site will be minimal to prevent possible damage to the ground.

Each villa is thoughtfully designed to provide stunning sea views and unique sunrises. The architectural solution successfully combines the atmosphere of the slope and the coast, harmoniously fitting into the hilly landscape with curved roofs.

The villa is comprised of several cleverly planned buildings, positioned to preserve the existing vegetation and provide privacy for every room, while glass-walled corridors create the feeling of being in a rainforest.

Materials for building and finishing have been carefully selected to satisfy even the most sophisticated customers. In addition, all villas are equipped with the "Smart Home" system for the convenience and comfort of residents.
