A new unique boutique project that includes six modern villas located in the picturesque Layan and Bang Tao beaches, in close proximity to the famous Laguna Phuket resort. The developer strives to ensure that each of the villas is a space equipped with amenities and comfort, designed for a full life in the conditions of the beautiful island of Phuket.

The concept implies houses for living, in which everything, from the basic elements to the smallest details, is thought out for your convenience.

When creating each villa, the goal is to provide the highest degree of functionality and comfort. Each object has individual recreation areas that allow you to change the environment without leaving your home.

The priority is to provide villas with high-quality technical equipment, providing personal space for each member of the family due to the large area and thoughtful layout. Make this project your new home with maximum comfort.
